PROJECTS

Personal Portfolio Website | HTML5, CSS, JavaScript, Bootstrap

Designed and developed a responsive portfolio website to present personal profile, technical skills, education, and project work in a clear, organized layout. Added navigation and professional links such as GitHub and LinkedIn, with a layout intended to work across desktop and mobile screen sizes.

Weather App | HTML5, CSS, JavaScript, Weather API

Built a web-based weather application that lets users search for a location and view weather information retrieved from a weather API. Used JavaScript to request and process API data and dynamically update the interface, with HTML and CSS for a clean, user-friendly presentation.
